

Indian Peafowl

(Pavo cristatus)

The Indian peafowl is the national bird of India, and can be found mainly in India, Pakistan, Sri Lanka, and other areas of south Asia. The male, known as the peacock, has large, brightly-colored feathers, which he displays to attract females (peahens) during courtship in spring. Peacock feathers are a beautiful iridescent blue, making them popular for use in artwork. Peafowl are also considered very useful birds to keep as they eat poisonous insects and snakes.
